1 Introduction

This document represent the formalisation of the deliverable D1.2 Project intranet and filestore.

2 Description of the deliverable

The consortium partners agreed on using a lightweight and quick tool for the filestore represented by a well known and cloud based service as Dropbox.

The project opened a dropbox account and structured a folder structure to help organizing activities.

The usage of the dropbox service is a value also for the versioning system that it offers and for is usable through all operative systems, accessible through web and easy to manage.

The main structure is represented below:

Branding	Used to host all logo from all the partners
Call Conference Minutes	To keep reference of the minutes of the calls
Running Documentation/WP1	The running documentation for the WPs
/WP2	
/WP3	
/WP4	
/WP5	
/WP6	
/WP7	
/WP8	
WP Final Version - Delivered/WP1	The final version of the deliverables send to the commission
/WP2	
/WP3	
/WP4	
/WP5	
/WP6	
/WP7	
/WP8	

The project will also produce software and this will be hosted on a public software repository like GIT, this mainly due to the fact that many pieces will be contributions to existing open source projects (mainly the pieces of integrations of the Open-DAI platform)

The software of the pilots will be published at the end of the development according to the project rules in the project web site.
